He's the one who noticed his mom's face was swollen.

[Music]

They are the ones she confided in about her change in vision and headache that wouldn't go away.

[Music]

He's the one who really listened when she said that something just didn't feel right.

[Music]

When she had chest pains a few weeks after delivery, she's the one who insisted on admitting her to the hospital.

Too many women die from pregnancy-related complications each year in the US. Death can occur during and up to a year after pregnancy. It doesn't have to be that way. Most deaths are preventable.

Know the warning signs. Hear her concerns. You could help save her life.
