

How to Run a Rate Table or SIR Report by Fiscal Year

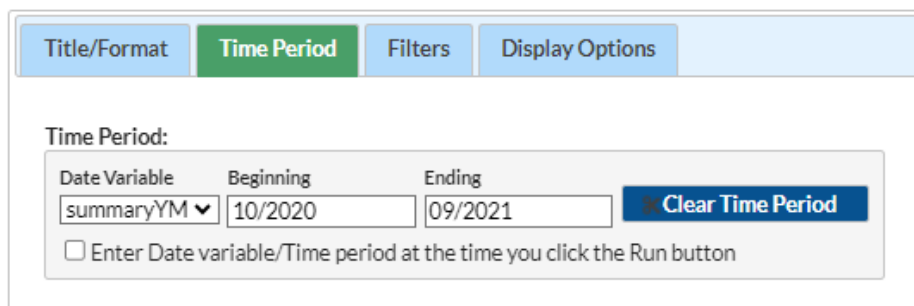

Guidance for the Patient Safety Component

This quick reference guide provides instructions for generating certain analysis reports, such as rates or standardized infection ratios (SIRs), for a fiscal year or other cumulative time period.

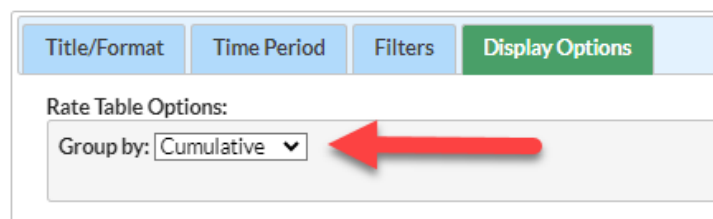

1. Open the Analysis Reports page and locate the report that you would like to run for the fiscal year. Right click on the report. Select “Modify Report.”

2. On the Modify screen, navigate to the Time Period tab. Select “summaryYM” as the “Date Variable.” Enter the month that your fiscal year begins in the “Beginning” field and the month that your fiscal year ends in the “Ending” field.

A screenshot of the 'Time Period' tab in a software interface. The tab is highlighted in green. Below the tab are four sub-tabs: 'Title/Format', 'Time Period', 'Filters', and 'Display Options'. The 'Time Period' section contains a 'Date Variable' dropdown menu set to 'summaryYM', a 'Beginning' text input field with '10/2020', and an 'Ending' text input field with '09/2021'. To the right of these fields is a 'Clear Time Period' button. Below the input fields is a checkbox labeled 'Enter Date variable/Time period at the time you click the Run button', which is currently unchecked.

3. Navigate to the Display Options tab. Change the value of the “Group by” dropdown menu from “summaryYM” to “Cumulative.”
