

STEADI: EMPOWERING HEALTHCARE PROVIDERS TO REDUCE FALL RISK WB4310R

PROGRAM DESCRIPTION: The purpose of the course is to educate healthcare providers about falls among older adults and about steps providers can take to prevent falls in their practices. The ultimate goal is to reduce falls among older adults, defined as anyone aged 65 and over, and to promote their health and independence.

OBJECTIVES:

At the conclusion of the session, the participant should be able to:

After completing the training, learners will be able to:

1. Explain the burden of falls as a critical public health issue among older adults
2. Describe CDC's STEADI initiative
3. Demonstrate use of falls screening tools
4. Identify patients' modifiable risk factors such as medication use
5. Describe strategies to reduce fall risk
6. Identify STEADI tools and resources for patients and providers
7. Discuss ways to implement fall prevention using an interprofessional team-based approach
